"The Daily DX" reports that the President of the Clipperton DX Club, Gerard, F2VX, announces a team from the CDXC will operate from Bhutan around **September 1st to 15th**. Some of the team members include Alain/ F6ANA, Denise/F6HWU (YL), Alain/F5LMJ and Gerard/F2VX. The team will be active on CW and SSB. More details will follow.

Charles, K4VUD, who is organizing a trip to Bhutan which we reported a few weeks ago now has all of the full details available on a Web page at:

During the contest, which runs from 1200z, **July 29th** until 1200z **July 30th**, they will be using the special contest callsign **GM2T**. Look for them to be on or near the usual IOTA frequencies. The Isle of Tiree is located at approximate Lat/Long 56 deg 30 min N, 6 deg 51 min W. Tiree is some 10 miles long and 3 miles wide, and is skirted by the Hebridean Sea to the South and East with the Atlantic Ocean to the North and West. The island has no trees, as they cannot root against the severe winter gales, but it is famed for its spring and summer sunshine records. Birds, flora and fauna not seen on the mainland can also be found on the island. A flat crofting land, Tiree has only three hills above 300 ft, with a coastline edged with long, windswept, shell sand beaches. For updates, check out the club's Web page at:

**KH5 & KH5K, KINGMAN REEF AND PALMYRA ATOLL.** The Kingman-Palmyra DX Group will activate two rare Pacific entities --- Kingman Reef (KH5K) and Palmyra Atoll (KH5) this year. Both counters sit high on the current "Most-Wanted Lists", with Kingman currently #3 in Europe. However, due to a special situation, their activation will occur in several phases over the summer and fall. About 1000 miles south of Hawaii, Palmyra Atoll is privately owned, and is currently in the process of being sold. The sale offers both challenges and opportunities for the DXpedition team. Their operations will be coordinated with all parties to the transaction, and they expect to benefit from temporarily enhanced access to the area. Accordingly, they plan several moderate-scale operations at Palmyra over the next several months by elements of their team, on a flexible schedule. Equipment is already on its way in preparation for these operations. The culmination of the plan will be a full-scale, 10-band activation of Kingman Reef in **October, 2000**.

**THE NORTHERN OHIO DX ASSOCIATION** (along with WVNO Radio) will sponsor its **4th annual Hospitality Suite** at this year's Dayton Hamvention. It will be in Suite 1011 on the

10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

**OPSSS DEPARTMENT.** In OPDX.459 (last week's bulletin), under "KH0, NORTHERN MARIANA ISLANDS", we mentioned Ban's callsign was JF2WSX. This is wrong. It should be **JF2WXS**.

**OY, FAROE ISLANDS.** Frank/DL2SWW, Ric/DL2VFR and YL operator Gabi/DG2TM will be active from Faroe Islands (**EU-018**) between **May 29th and June 8th**. They plan to operate on 160-2 meters mostly on CW with some SSB and RTTY. For further info, contact Ric via E-mail at: [dl2vfr@online.de](mailto:dl2vfr@online.de)

**PY0F, FERNANDO DE NORONHA.** Remember to look for Gerard, F2JD/PY2ZDX, to be active as **PY2ZDX/PY0F** now **through May 15th**. He will operate SSB/CW on 40-6 meters. After this operation he will go back to France.
